- Thrive with industry leading commission plans that enable you to build a significant business while providing huge savings to your clients.

WHY YOU SHOULD CARE

70%

Over 70% of people ages 18-64 can benefit from a prescription savings card due to increasing costs of high deductible health plans, high copays, and being underinsured or uninsured.

40%

40% of the top ten most prescribed drugs have increased in price by over 100%, while prescription benefits are rapidly decreasing.

30

The average family of four gets over 30 prescriptions per year. Many of those prescriptions are either not covered or are too expensive on their health plans.

Most of your clients are already using an RX savings card - you're just not getting credit for it.
