

Benefit Enrollment Made Easy

Engage

Concise, engaging communication and delivery is key to successful enrollment. Together, EVHC and Selerix's industry-leading flexibility allows employers to convey their offering in a unique and impactful way.

- Innovative decision support tools
- Tailored messaging and dynamic content for an impactful enrollment experience
- Industry-leading flexibility to create ideal enrollment conditions

Manage

Eliminate variables, gain valuable time and resources with centralized benefit administration capabilities.

- Compliance, eligibility management, reporting and enrollment from one platform
- Cloud-based E2E BenAdmin: 365/24/7
- Dedicated Service Team

Simplify

From complex benefit rules to standardized integrations and data exchanges, Benefit Enrollment powered by Selerix simplifies the process. Setup is a breeze with the standardized components like:

- Business rules
- Rating scenarios
- Application forms
- Outlines of Coverage
- Setup instructions included
- Minimal configuration required

Create An Impactful Enrollment Experience

Web Enrollment

The web-based enrollment platform accommodates both self-service and agent-assisted enrollment via co-browse sessions. It also includes custom carrier and employer forms—all automatically filled-out with verified PINs or digitized signatures for a 100% paperless solution. Better yet, we can completely configure the enrollment website to accommodate an employer's eligibility rules and plans.

Laptop Enrollment

Some employers may prefer an offline or "laptop" enrollment if they are using an enrollment service, wish to assist employees, or have employees with limited internet availability. For these EVHC clients, Benefit Enrollment powered by Selerix offers a standalone program that performs enrollments from a laptop or other offline device. The enroller conveniently synchronizes enrollments done on a laptop with the admin website daily. This makes offline enrollment not only possible, but simple.

Capabilities that work smarter, not harder.

Powerful Features Included in Setup

From enrollment to ACA compliance, this unique blend of technology and service is leading the industry and changing the game. Included in setup, EVHC clients can benefit from features like:

- Census preparation & upload
- Configuration of rates & eligibility rules for core & voluntary products
- Configuration of imports & exports for data exchanges
- Deployment of onscreen benefit presentations
- Preparation of custom forms
- Preparation of laptop software
- Preparation of benefits statement report

A One-Stop-Shop for Benefit Administration

The Selerix Admin website gives authorized users full access and control over employee enrollments, from initiating and wrapping up enrollments, to managing any aspect of an employee's enrollment.

From a single website, authorized users can:

- Look up employees
- Initiate an enrollment session with an employee
- Wrap up an enrollment
- Run and view reports
- Interactively manage enrollment status
- Deliver data files and reports to authorized recipients
- Configure or change groups on the system

Reach out to your EVHC sales representative for full details and simplify benefit enrollment today.
