

BCBSIL myVirtualCare AccessSM

BCBSIL myVirtualCare Access makes it easier for team members to access health care anytime, from anywhere. Team members can receive common services with little to no out-of-pocket cost. The plan is designed to provide high quality care, with a Teladoc Health virtual primary care physician (PCP) who is responsible for coordinating care, providing referrals, and helping you navigate the next steps in your care journey.

Below are some of the key features of the plan:

- Tier 1 applies when you use Teladoc Health virtual care services or your Teladoc Health virtual PCP refers you in-person to in-network providers, including certain Walgreens Health Partner providers and other BCBS network providers.
- Tier 2 applies when you go directly to an in-person provider in the BCBS network without a referral from your virtual primary care physician.
- Dependents under the age of 18 are required to see an in-person provider. All their care will be covered at tier 1, no referral needed. Care received from their in-person pediatrician will be \$0 copay and all other in-person care received (labs, specialists, etc.) will be covered according to tier 1 benefits outlined below.
- The annual deductible and out-of-pocket maximum apply between tiers, so the maximum paid is the tier 2 deductible and out-of-pocket maximum.
- Copays apply towards your out-of-pocket maximum.

	BCBSIL myVirtualCare Access	
	Tier 1	Tier 2
