

EVHC Support Solution

Getting members the right in-the-moment support during the first visit and keeping them engaged throughout treatment is key for achieving high quality care with optimal outcomes.

That's why EVHC's Support Solution program starts with the classic Employee Assistance Program (EAP) and then adds robust Recovery and Outreach Integration to make sure members continue to get the care they need.

*Services for behavioral health conditions are 10% more likely (16%-6%) to be OON (compared to services for other conditions). On average, charges show 50% higher when choosing out-of-network providers for EAP services, per EVHC BOB 2020. **Survey powered by CuraLinc.
